

Aloha and thank you for your interest in our perinatal genetic counseling class!

The purpose of this class is to inform you of the available options for perinatal genetic screening at Tripler Army Medical Center.

Virtual classes are offered every Wednesday from 0800-0900 HST.

You can be scheduled into the class by your OB registration nurse.

Please consider the following prior to the class start time:

1. The class is scheduled for one hour, including questions. We will do our best to answer all questions, but we do need to end the class on time. At the conclusion of the class we will provide a means to address any unanswered questions.
2. The class will be hosted over MHS Genesis and you can access with your preferred device, though you must have Chrome downloaded to use this platform. Please ensure you have a reliable internet connection prior to class starting. You will receive a link to the class once your appointment is made and your email address is confirmed in your Genesis profile. If an incorrect email is in your Genesis profile, you will not receive the link.
3. The instructor will use audio, video, and screen sharing to conduct the class. Participants are not expected to use video and participant audio will be muted. Questions will be taken from the chat.
4. At the end of the class you will be informed of how to request the genetic screening of your choice. In order to communicate your requests to us, you will need to use the MHS Genesis Patient Portal. If you have not already done so, please sign up for Patient Portal access at: <https://patientportal.mhsgenesis.health.mil> . When you are ready to communicate your screening preferences, please login to the Patient Portal, select "Send Message" and choose "Tripler OB/GYN Antepartum Diagnostic Center (ADC) Clinic." If you type "ADC" this will quickly narrow your choices.

We look forward to seeing you in our perinatal genetic counseling class soon!
